Integrated Logistics

JF Hillebrand’s approach to tailored beverage logistics
What is Integrated Logistics?

• A managed service that makes the complex simple

• Whatever your beverage requires, and wherever it’s journey begins or ends: we bring it to the market, we take care of it, and we deliver it to your customer

• JF Hillebrand’s integrated logistics solution is designed to help global customers manage their complex, multi-regional supply chains and logistics networks
What is Integrated Logistics?

- Our Integrated Logistics service team provide solutions, combining logistics expertise, IT-tools and Project Management skills, including:
  - Logistics network analysis and design
  - Warehousing and distribution management
  - Information management, IT-systems and reporting
  - Labelling, packaging, strip stamping etc
  - International transportation and freight forwarding
  - Customs brokerage and fiscal handling

- Using any combination of services, we act as a global partner to plan, manage, execute and follow-up on critical parts of the supply chain

- Integrated logistics is a combination of JF Hillebrand's capabilities and experience in beverage logistics, warehousing, customs and value added services based on state of the IT-systems and visibility solutions.
Our Integrated Logistics solutions can be tailored with varying levels of complexity and service profiles to fit your needs:

- Transportation planning, order timeliness
- Planning, managing and execution of stock and consolidation, warehouse and inventory management
- Transportation management, Load optimisation, customs handling, shipping documentation, freight auditing
- Customs clearance, fiscal reporting, demurrage management
- Planning, managing and execution of stock and distribution, warehousing and inventory management

  - Design optimal goods flows
  - Shorter lead times
  - Simplify administration

- Standardise global logistics processes
  - Control supply chain execution
  - Best of breed IT-systems and integration
  - Uniform KPI’s and reporting
Why JF Hillebrand’s Integrated Logistics?

- Our Integrated Logistics service is built on JF Hillebrand’s core expertise and capabilities:
  - People – our expertise and specialist focus enable us to find the best solutions for our clients
  - Process – our global processes and standards ensure that your products are cared for from pick up to final delivery. As a long term partner, we continuously work to improve service and performance
  - Network - our global network has the capability and flexibility to move with market dynamics. We control Logistics Hubs or co-ordinate 3rd party providers, fulfilling service levels and cost requirements
  - IT-systems – logistics management and order execution, delivered by state of the art IT-systems. Visibility and connectivity enables efficient flow of data, and minimises administration
Development, Planning and Execution

• Contact us to develop, plan and execute the appropriate solution and deliver value to your business. Together we will:
  
  o Design, plan and dimension the logistics network
  o Establish global supply chain processes and standards
  o Customise information management and integrate IT systems
  o Set standard operating procedures for service execution
  o Allocate dedicated people
  o Set SLA and KPI including reporting routines
  o Source and set-up Logistics Hubs or 3PL suppliers
  o Continuously develop and improve operational performance and cost levels
